JOINED: October 2022

About me

I have lived in the village for over 25 years and would visit my Aunt most weekends when I lived in Bow in the late 80's when she lived in Highfield.

My work is in circuit board manufacturing. I started in the industry over 30 years ago, working my way up to be the senior PCB planning engineer with a local company.

Working up from the bottom has taught me to never ask someone to do something you are not willing to do yourself and respect everyone for the work they do.

I am a dad of 4 children who have all gone to our great school in the village, with my youngest just about to start her final year of primary school.

I had hoped to be involved with a neighbourhood plan. I'm particularly interested in there being more affordable housing available in Lapford for young people.

Lapford from the ages

What I'd like to achieve

I would like to work towards the Parish coming together, co-operating with each other for the benefit of all. I hope we can use our differing opinions and ideas in a constructive manner to provide the best future for Lapford for generations to come.

Looking to the future
